TALABAT ONBOARDING

Your shop on Talabat. *Done properly.*

We build your Talabat listing the right way: a bilingual menu, add-ons and options, photos and prices. Built to Talabat's rules, so it goes live clean. Sign-up is included from Pro and up.

◆ 3 clear packages from AED 990

◆ Free audit for existing listings

◆ Arabic & English menus

On Talabat, your menu *is* your shopfront.

Every item is reviewed

Talabat reviews every item and photo before it goes live. A zero price, a spelling mistake or a photo that doesn't match the dish gets rejected.

Mistakes cost orders

Missing descriptions, wrong prices, duplicate items, messy add-ons and sections shown at the wrong time all push customers away.

We get it right first time

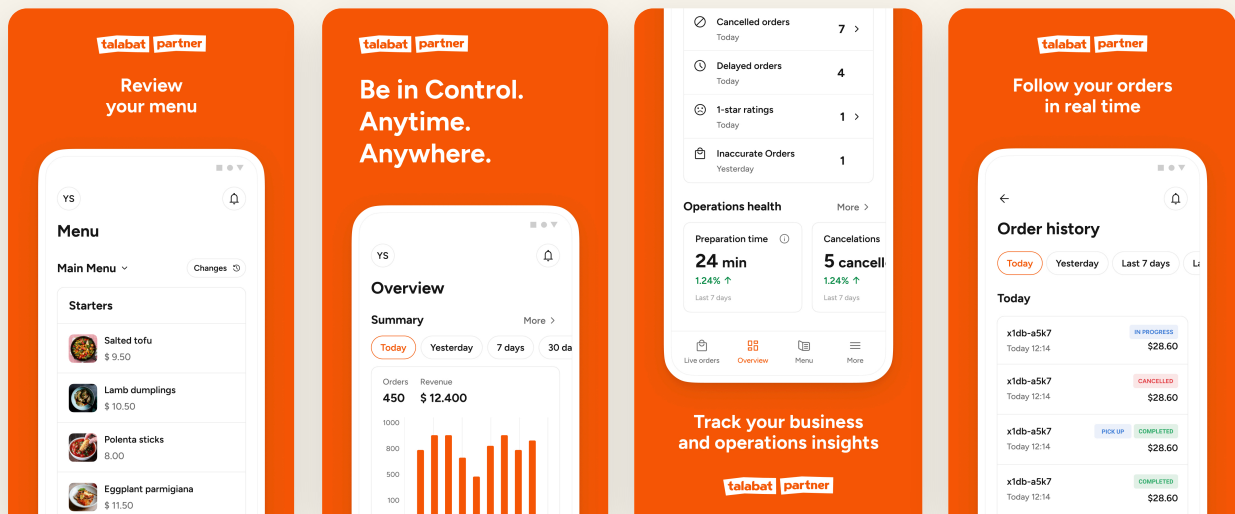

We build to Talabat's rules, in small checked stages, off-peak, without closing your shop.

THE PLATFORM WE SET UP

Talabat

Partner Hub: categories, items, sizes, choice groups, photos, prices, all in Arabic & English.

◆ We focus on Talabat Partner Hub, where we can do the full menu work ourselves.

Official partner-app screenshots published by Talabat (Google Play).

Three packages. One-time price.

A fixed setup fee plus a price per product. No monthly contract required.

Prices cover Talabat only. Photo details on page 7.

Add-ons & options

A small, reusable set of choice groups with min/max rules and prices.

Prices matched to your counter; suggestions after commission (Pro & A to Z).

9

Live check

We check the menu from the customer app: photos, crops, prices, options.

Photos: what we do, and what it costs

Photo editing and photography are two different things. Here is exactly what each one means.

Photo editing (included, on photos YOU send)

We take the photos you give us and fit them to each app's size and rules: we crop, resize, straighten, correct brightness and colour lightly, and export them in the right format. In A to Z and Profile upgrade we also clean the background (plain background, small marks and stray objects removed). We never add, remove or change the food itself: the photo must show what the customer will really receive.

Photo editing is NOT new photography. Editing cannot create photos you do not have. If you have no usable photos, a photographer has to shoot them. That is a separate paid service (see "New photography" below). Click does not send a photographer free of charge. Real photos only: no AI-generated food photos, no photos taken from the internet or from other restaurants.

What your photos need to be good enough

- Real photos of your own food, as it is really served.
- Sharp and in focus, in daylight or good light. No flash, no dark or yellow light.
- At least 1,200 pixels on the short side: use the phone's normal camera, not a screenshot. Send the original file (on WhatsApp use 'send as document'), not a compressed copy.
- The whole dish in the frame, on a clean plate and a clean plain surface, one product per photo.
- The photo must match the item's name, quantity and size on the menu.
- No watermark, logo overlay, phone number, QR code, price or text on the photo.

Editing cannot fix a blurry, dark, tiny or badly framed photo. If a photo is not good enough, we tell you and ask for a new one. If you do not send a better one, we fit the photo you sent and use it as it is. Click is not responsible for a weak listing, for lower results, or for an app rejecting a photo, when the cause is the quality of the photos you supplied. Each app has the final say on approving a photo.

What each option covers (photos you send)

Option	What we do to your photos	Limit included	Each extra photo
P1 Basic	Prepare: crop, resize, light brightness fix, export to Talabat's size and format	1 photo per product + 1 cover + 1 logo	AED 10
P2 Pro	Prepare (same as P1)	1 photo per product + 1 cover + 1 logo	AED 10
P3 A to Z	Edit & clean: Prepare, plus clean background, remove small marks, colour correction	1 photo per product + 1 cover + 1 logo	AED 25
Profile upgrade (AED 1,490)	Edit & clean (same as P3), on your live listing	Up to 50 photos	AED 25
Monthly care (AED 750)	Prepare, for new or changed items	Up to 10 photos per month	AED 10

Clean background on a P1 or P2 photo: AED 25 per photo. One round of corrections per batch. A different style or a new photo is a new job.

New photography: a separate paid extra

Click does not include a photographer in any package. If you need new photos, a photographer visits your shop and shoots your real products. Paid in full before we book the visit, like all our work.

Visit	What is included	Price (AED)
Half-day visit	Up to 4 hours, up to 25 items, 1 edited photo per item (Edit & clean)	2,400
Full-day visit	Up to 8 hours, up to 60 items, 1 edited photo per item (Edit & clean)	5,000
More than 60 items	Another full day	5,000 per day
Add to a booked visit	An extra item / an extra angle of the same item	80 / 40 each

- Edited photos are delivered within 5 working days after the visit.
- You prepare the dishes fresh and ready when the photographer arrives, with plates, a clear table near natural light, and a staff member to help.
- Outside Ras Al Khaimah: travel +AED 300.
- Change the date with at least 48 hours' notice at no charge. Later changes, or no access on the day: 50% of the visit price.
- The photos are yours to use on your menus and apps. We show them in our portfolio only with your written approval.

Shoots can be booked with any package, or on their own.

Which one do I need?

- Your photos are good and clear: photo editing (included in the package).
- Your photos are weak, or you have none: a paid photography visit.
- Not sure: start with the free audit and we will tell you.

Start with the free audit: we tell you whether your current photos are enough or whether you need a photographer.

Example: a cake shop with 50 products, A to Z, with a full-day shoot

A to Z: $3,900 + 50 \times 49 = \text{AED } 6,350$. Full-day visit (up to 60 items): AED 5,000. Total: AED 11,350.
Without the shoot (the shop already has good photos): AED 6,350.

Real photos only

We do not use AI-generated food photos, or photos from the internet or from other restaurants.
